1. Carefully read the question and answer accordingly.What services are included in EX1 plan

Lync Online

Skype

Exchange online ------------

None of the listed options

2.Carefully read the question and answer accordingly.Which of the following options are referred as flavors of SharePoint

On Premise Online(O365)

Enterprise Foundation

All of the listed options -------------------

None of the listed options

3.Carefully read the question and answer accordingly.What is template id to be used while creating user custom list

100-------

>=1000

>=10000

None of the listed options

4. Carefully read the question and answer accordingly.Easiest way to attach an approval workflow to multiple lists?

Using Content types---------

Manually attach to multiple lists

Create custom approval workflow using Visual Studio

Create a new list definition

5. Carefully read the question and answer accordingly.There can more than one app catalog site for a farm

TRUE -----------------

FALSE

6. Carefully read the question and answer accordingly.What are some of new changes in SharePoint 2013?

Minimal download strategy

Claims Based authentication

option A &B------------

improved Meetings workspace

7.Carefully read the question and answer accordingly.What is the minimum number of site collection needed by the web application?

0

3

4

1 --

8. Carefully read the question and answer accordingly.Which Webpart will be used for indexed content.

A) Content Editor

B) Content Query

C) Content by Search --------------

D)Both B and C

9. Carefully read the question and answer accordingly.What is the base type of generic list

0-------------

1

2

3

10. Carefully read the question and answer accordingly.Access a specific site under site collection in Sharepoint using CSOM

SPWeb

SPSite

SPWebApplication

Web---------------

11. Carefully read the question and answer accordingly.Challenges in Workflow of SharePoint 2010 are

A) Designed for OnPremise and Cloud Hosted

B) Executed in the context of SharePoint as super user ----------------

Both A and B

None of the listed options

12. Carefully read the question and answer accordingly.Design Manager is available for which type of site

team site

blank site

publishing site-------------

collaboration site

13. Carefully read the question and answer accordingly.User Profile properties can be accessed with

SSOM

CSOM

JSOM

All of the listed options--------------

14. Carefully read the question and answer accordingly.Which service does Angular use internally to process a page and handle directives on the page?

$compile --------------

$locale

$http

$filter

15. Carefully read the question and answer accordingly.What are some of the deprecated features in SharePoint 2013?

Sandboxed Solutions

Document and Meeting Workspaces

Chart Web Part

All of the listed options ------------

16. Carefully read the question and answer accordingly.app prefix can be configured for a specific web application

TRUE --

FALSE

17. Carefully read the question and answer accordingly.Method used for creating any child controls

Render

OnPrerender

TRUE

FALSE --

64.Carefully read the question and answer accordingly.What is External System Throttling Limit

5000

2000 ----------------------------------

50000

20000

65.Carefully read the question and answer accordingly.What is the advantage of Knockout over Angular ?

Observable Pattern

More Control to developers

Lightweight

All of the listed options -----------------------------------

66.Carefully read the question and answer accordingly.You need to deploy the package. Which file you would select

a file ending in .publish

a file ending in .wsp -----------------------------------

a file ending in .dll

a file ending in .app

67.Carefully read the question and answer accordingly.Custom master page needs to be uploaded under which category

look and feel->master page

site collection feature->sharepoint publishing infrastructure

site feature->sharepoint server publishing

web designer gallery->master page and page layout --------------------------------------

68.Carefully read the question and answer accordingly.What is a Content type?

It is a reusable column definition or template that user can assign to multiple lists across multiple SharePoint sites ------------------------

It dictates the overall look and feel of a web page.

It is a set of columns that are grouped together to serve a specific purpose

It define the common layout and interface for SharePoint pages

69.Carefully read the question and answer accordingly.Can event receivers be attached to external lists?

Yes --

No

70.Carefully read the question and answer accordingly.site pages are available in

site assets

page library ---

database

template folder

71.Carefully read the question and answer accordingly.Which property do you use on a SPFile object to check its Check-Out status

CheckOutType ----------------------------------

CheckInStatus

CheckOutStatus

IsCheckOut

72.Carefully read the question and answer accordingly.You receive an error when you deploy the app. You need to resolve the error. What should you do?

Deploy the app to http://contoso-public.sharepoint.com ----------------------------------

enable site loading of apps in the visual studio project properties

Deploy the app to https://contoso-my.sharepoint.com

Deploy the app to https://contoso.sharepoint.com/tasks

73.Carefully read the question and answer accordingly.What do you need to do to support older versions of IE with Angular?

A) Polyfill JSON.stringify

B) doesn’t support old version

C) avoid custom tag name directives

A and C --------------------------------------

74.Carefully read the question and answer accordingly.To overcome error "The security validation for this page is invalid. Click Back in your Web browser, refresh the page, and try your operation again" when saving an item "item", which 2 techniques can be used

SPWeb web = item.Web;

web.AllowUnsafeUpdates =true;---

OR

SPUtility.ValidateFormDigest()

SPWeb web = item.Web;

SPUtility.FormDigest.Validate()

OR

AllowUnsafeUpdates = True

SPWeb web = item.Web;

AllowUnsafeUpdates = false;

OR

SPUtility.ValidateFormDigest()

item.AllowUnsafeUpdates = true;

OR

SPUtility.ValidateFormDigest()

75.Carefully read the question and answer accordingly.What is the best practice to push custom code logic in declaritive workflows?

use Web services ----------------------------

use Interop bridge

use visual studio

All of the listed options

76.Carefully read the question and answer accordingly.Can we use publish the Contenttypes from One sharepoint server farm to Another

Yes --

No

77.Carefully read the question and answer accordingly.C# code can be written in Provider hosted APP.

TRUE ---

FALSE

Can't Say

None of the listed options

78.Carefully read the question and answer accordingly.Azure is the only place to host a provider hosted app

TRUE

FALSE -----------------------

79.Carefully read the question and answer accordingly.What are the ngClass directive has two companion directives?

A) ngClassEven

B) None

C) ngClassOdd

Both A and C------------------------------------

80.Carefully read the question and answer accordingly.How do you navigate to a new view from code?

window.location.url ='url'---

form.url.view ='#viewname'

$location.url('newUrl');

$route.reload('newUrl')

81.Carefully read the question and answer accordingly.SharePoint 2013 workflow are Packaged as

.WSP & .CAB

.APP & .CAB

Only .WSP

.WSP & .APP ---

82.Carefully read the question and answer accordingly.What permission level should we use to grant create

and edit permissions but not delete?

Contribute
